WORKFORCE EMPOWERMENT

WHO NEEDS ONLINE TRAINING?

PRESIDENTS & CEO'S rest easier knowing their business is protected from legal and compliance pitfalls

HR DIRECTORS enjoy faster and more effective ways of onboarding new hires. Plus, they reap the benefits of automating annual training.

RISK MANAGERS like knowing their plans are in place to avoid, reduce, or transfer risk that could impact the company's profitability.

SAFETY MANAGERS appreciate being able to ensure everyone in the company complies with health and safety laws.

EMPLOYEES benefit from having one place to receive training, newsletters, announcements, policies, procedures, and other communication.

TRAINING CONVERSATION

What is your biggest hurdle to training?

How would your employees benefit from having access to a single source for training, policies, and announcements?

Can you easily generate training reports on an individual employee or a group of employees by location or job function?

If you had to go to court tomorrow, do your training records show a culture of training and safety?

How are you currently measuring the ROI on your training efforts?

"Our orientation beforehand was four to five days in the office. Now it's down to two days."
